

Seed threshing equipment

Machines and equipment for the threshing of seeds from dry plants (umbels, siliques or pods).

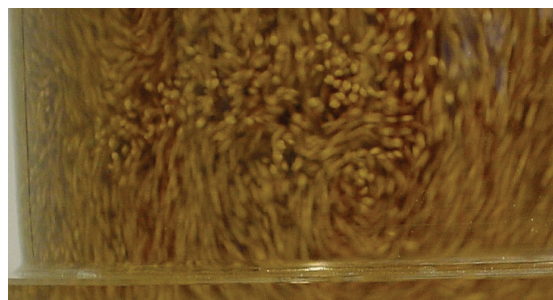

Seed extraction equipment

Machines and equipment to extract seeds from vegetable fruit crops like tomatoes, peppers, cucumbers, melons and gherkins.

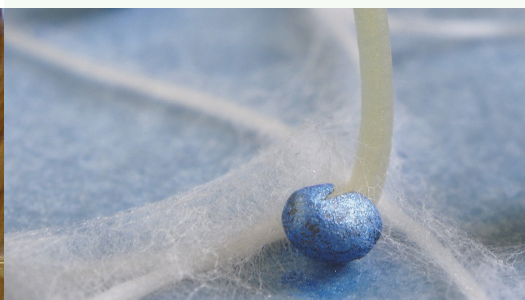

Seed drying equipment

Machines and equipment especially developed for the drying of seed lots. Achieve uniform drying results and offer possibilities to dry with desired air temperature and humidity (RH).

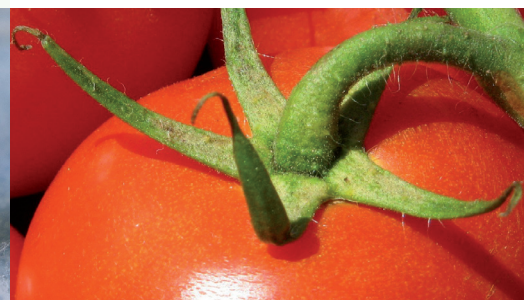

Seed technology equipment

Machines and equipment to achieve a faster and uniform germination or disinfect seeds to treat against bacterial contamination or viruses.

Seed quality control equipment

Machines and equipment to perform germination testing and store seed in secured conditioned cabinets.

Laboratory seed cleaning equipment

Machines and equipment especially designed to clean and upgrade small seed lots.

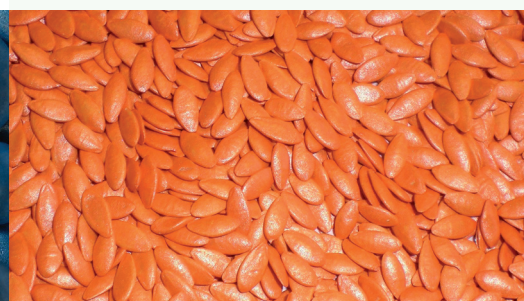

Seed fine cleaning equipment

Machines and equipment especially designed to clean and upgrade large seed lots.

Seed pelleting equipment

Machines and equipment especially designed to add a coating layer to the seed to change the shape and improve plantability.

Seed film coating equipment

Machines and equipment to treat seeds with a coating and crop protection.

Seed storage, dust-suction and transportation equipment

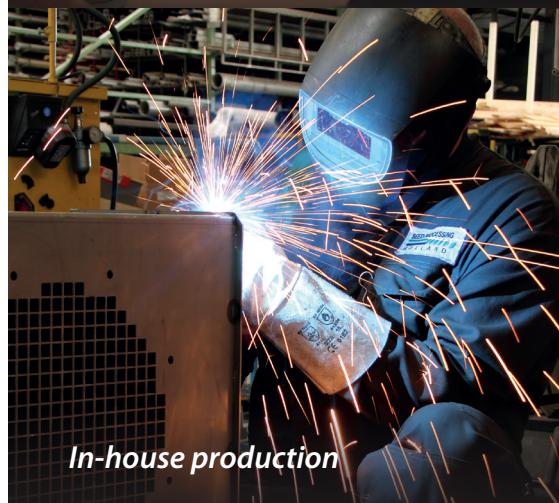

Machines and equipment to store seed, to transport seed or dust suction.

Head office in Enkhuizen

R&D department

In-house production

Seed Processing Holland B.V. is for almost 50 years
THE specialist in the development and production of
 equipment and machines for the seed processing industry.

Mission Statement: "To supply vegetable and flower seed companies worldwide with high quality and safe seed processing equipment and installations which give an added value to seeds and the process efficiency"

For almost all processes, from the moment of seed extraction, till the seed storage we have suitable solutions. Seed Processing Holland B.V. is a professional organization that's pleased to cooperate with professional organizations where everything is about **quality**. Quality that is reflected in a final product that meets all the requirements and needs in terms of health, safety and dust control.

The quality is guaranteed because:

- Seed Processing Holland has several certificates such as: ISO 9001:2008, VCA & UL 508A.
- A staff of about 50 employees with long employments. We have an active education program to guarantee the knowledge and skills.
- R&D department for new developments and an engineering office for our standard program and product enhancement:
 - ± 150 standard machines, divided in 10 product groups. Usage of high quality parts of brands that are worldwide available such as Lenze, Festo, Schaeffler, Eaton and Hitachi. The machines comply with the European Machinery directive 2006 / 42 / EG and customer specific HSE-guidelines.
 - Custom-built special machines and turn-key projects.
- In-house production and assembly department:
 - Everything is produced and assembled in Enkhuizen, The Netherlands.
 - In-house panel building and software programming.
 - Service department with VCA certified personnel for fast handling of disturbances.
 - And worldwide maintenance and installation activities.
